Vitamin D, 25-Hydroxy  
,Chemiluminescent Microparticle Immunoassay  
(CMIA)

34  
ng/mL

Deficient: < 20  
Insufficient: 20-30  
Sufficient: 30-100  
Potential Toxicity: > 100

## Thyroid Function Test (TFT) | Serum

Triiodothyronine (T3), Total  
Chemiluminescent Microparticle Immunoassay  
(CMIA)

1  
ng/mL

0.35 - 1.93

Thyroxine (T4), Total  
Chemiluminescent Microparticle Immunoassay  
(CMIA)

2  
µg/dL

4.87 - 11.72

Thyroid Stimulating Hormone (TSH)  
Chemiluminescent Microparticle Immunoassay  
(CMIA)

3  
µIU/mL

0.35 - 4.94

## MICROBIOLOGY

## Culture &amp; Sensitivity - Aerobic, Urine

|                   |   |                      |
|-------------------|---|----------------------|
| Report Status     | : | Final Report         |
| Incubation period | : | 48 hrs of incubation |
| Specimen          | : | Aspirated fluid      |

## Culture

## Pathogen

## Colony Count

Candida boidinii

## Sensitivity for 'Candida boidinii'

| Antimicrobial    | Sensitivity  | MIC Value |
|------------------|--------------|-----------|
| Amphotercine - B | Sensitive    | 34        |
| Caspofungin      | Intermediate | 44        |
| Fluconazole      | Resistant    | 23        |
| Ketoconazole     | Susceptible  | 22        |

## Interpretation &amp; Notes:

- Interpretation done as per CLSI M100.
- A negative culture (or) No growth report indicates the absence of pathogenic organisms.
- False-negative results can be caused by low number of microorganisms, prior antimicrobial treatment, the fastidious nature of the infective organism.
- A positive culture report may mean that a patient is having a bacterial or fungal infection.
- False-positive culture report can result from contamination of the specimen with skin microbiome.

## CONDITIONS OF LABORATORY TESTING &amp; REPORTING

- It is presumed that the test sample belongs to the patient named or identified in the test requisition form. Test results released pertain to the specimen submitted.
- Laboratory investigations are only a tool to facilitate arriving at a diagnosis and should be clinically correlated by the Referring Physician.
- All tests are performed and reported as per the turnaround time stated in the Orange Health Labs Directory of Services (DOS).
- Orange Health Labs confirms that all tests have been performed or assayed with the highest quality standards, clinical safety & technical integrity.
- All test results are dependent on the quality of the sample received by the Laboratory and the assay technology.
- Report delivery may be delayed due to unforeseen circumstances. Inconvenience is regretted.
- A requested test might not be performed if:
  - The specimen received is insufficient or inappropriate, or the specimen quality is unsatisfactory
  - Incorrect specimen type
  - Request for testing is withdrawn by the ordering doctor or patient
  - There is a discrepancy between the label on the specimen container and the name on the test requisition form
- Test results may show interlaboratory variations.
- Test results are not valid for medico-legal purposes.
- This is a computer-generated medical diagnostic report that has been validated by an Authorized Medical Practitioner/Doctor. The report does not need a physical signature.

## REPORT PRINTOUT/HARDCOPY

- Patients can collect free report printouts from our Lab or the nearest Collection Centre.
- Hard copies can be delivered within 24 hours for ₹200/report (non-refundable after dispatch).
- For assistance, contact Orange Support at +91-9008111144.
