Culture & Sensitivity - Aerobic, Urine

Report Status	:	Final Report
Incubation period	:	48 hrs of incubation
Specimen	:	Aspirated fluid

Culture

Pathogen

Colony Count

Candida boidinii

Sensitivity for 'Candida boidinii'

Antimicrobial	Sensitivity	MIC Value
Amphotercine - B	Sensitive	34
Caspofungin	Intermediate	44
Fluconazole	Resistant	23
Ketoconazole	Susceptible	22

Clinical Significance - Culture & Sensitivity - Aerobic, Urine

- Interpretation done as per CLSI M100.
- A negative culture (or) No growth report indicates the absence of pathogenic organisms.
- False-negative results can be caused by low number of microorganisms, prior antimicrobial treatment, the fastidious nature of the infective organism.s, prior antimicrobial treatment, the fastidious nature of the infective organism.s, prior antimicrobial treatment, the fastidious nature of the infective organism.s, prior antimicrobial treatment, the fastidious nature of the infective organism.
- A positive culture report may mean that a patient is having a bacterial or fungal infection.
- False-positive culture report can result from contamination of the specimen with skin microbiome.

CONDITIONS OF LABORATORY TESTING & REPORTING

- It is presumed that the test sample belongs to the patient named or identified in the test requisition form. Test results released pertain to the specimen submitted.
- Laboratory investigations are only a tool to facilitate arriving at a diagnosis and should be clinically correlated by the Referring Physician.
- All tests are performed and reported as per the turnaround time stated in the Orange Health Labs Directory of Services (DOS).
- Orange Health Labs confirms that all tests have been performed or assayed with the highest quality standards, clinical safety & technical integrity.
- All test results are dependent on the quality of the sample received by the Laboratory and the assay technology.
- Report delivery may be delayed due to unforeseen circumstances. Inconvenience is regretted.
- A requested test might not be performed if:
 - The specimen received is insufficient or inappropriate, or the specimen quality is unsatisfactory
 - Incorrect specimen type
 - Request for testing is withdrawn by the ordering doctor or patient
 - There is a discrepancy between the label on the specimen container and the name on the test requisition form
- Test results may show interlaboratory variations.
- Test results are not valid for medico-legal purposes.
- This is a computer-generated medical diagnostic report that has been validated by an Authorized Medical Practitioner/Doctor. The report does not need a physical signature.

REPORT PRINTOUT/HARDCOPY

- Patients can collect free report printouts from our Lab or the nearest Collection Centre.
- Hard copies can be delivered within 24 hours for ₹200/report (non-refundable after dispatch).
- For assistance, contact Orange Support at +91-9008111144.
